	COMPLAINT AND DEMAND FOR JURY TRIAL						

P.C., hereby submits the following Complaint and Demand for Jury Trial against
 Defendant TABLETOPS UNLIMITED, INC (hereafter referred to as "Defendant
 TTU" or "Defendant") alleges the following upon personal knowledge and belief, and
 investigation of counsel:

NATURE OF THE CASE

6 1. This is a product liability action seeking recovery for substantial personal
7 injuries and damages suffered by Plaintiff, after she was seriously injured by a
8 "Philippe Richard Pressure Cooker" Model Number YPC 2055C (hereafter generally
9 referred to as "pressure cooker(s)").

Defendant TTU designs, manufactures, markets, imports, distributes and sells
a wide range of consumer products, including the subject "Phillippe Richard Pressure
Cooker," which specifically includes the aforementioned pressure cooker at issue in
this case.

14 3. On or about December 2, 2020, Plaintiff suffered serious and substantial burn
15 injuries as the direct and proximate result of the pressure cooker's lid suddenly and
16 unexpectedly exploding off the pressure cooker's pot during the normal, directed use
17 of the pressure cooker, allowing its scalding hot contents to be forcefully ejected from
18 the pressure cooker and onto Plaintiff.

4. As a direct and proximate result of Defendant TTU's conduct, the Plaintiff in
this case incurred significant and painful bodily injuries, medical expenses, wage loss,
physical pain, mental anguish, and diminished enjoyment of life.

22

 $\mathbf{5}$

THE PARTIES

23
5. Plaintiff was, at all relevant times, a resident of the City of Euless, County of
24
Tarrant, State of Texas.

25 6. Defendant TTU is a California Corporation, which has a headquarters and
26 registered service address of 23000 Avalon Blvd., Carson, CA 90745. Defendant TTU
27 designs, manufacturers, markets, imports, distributes and sells a variety of consumer
28 products including pressure cookers, cutlery, pots, and pans, amongst others.

2

JURISDICTION AND VENUE

7. This Court has subject matter jurisdiction over this case pursuant to diversity
jurisdiction prescribed by 28 U.S.C. § 1332 because the matter in controversy exceeds
the sum or value of \$75,000, exclusive of interest and costs, and there is complete
diversity between the parties.

6 8. Venue is proper in this Court pursuant to 28 U.S.C. § 1391 all or a substantial
7 part of the events or omissions giving rise to this claim occurred in this district.

8 9. Venue is also proper in this Court pursuant to 28 U.S.C. § 1391 because
9 Defendant is a resident and citizen of the State of California and this district; has
10 sufficient minimum contacts with the State of California; and has intentionally availed
11 itself of the markets within California through the promotion, sale, marketing, and
12 distribution of its products.

13

FACTUAL BACKGROUND

14 10. Defendant TTU is engaged in the business of designing, manufacturing,
15 warranting, marketing, importing, distributing and selling the pressure cookers at
16 issue in this litigation.

17 11. Defendant TTU warrants, markets, advertises and sell its pressure cookers as
18 a means to cook "faster" and "healthier" allowing consumers to "preserve nutrients and
19 flavors." ¹

According to the Owner's Manual accompanying the individual unit sold, the
pressure cookers purport to be designed with an "auto-lock system,"² and "triple safety
features"³ which include the misleading the consumer into believing that the pressure
cookers are reasonably safe for their normal, intended use. Said "safety systems"
include, but is not limited to, the following:

 $\mathbf{5}$

a. The PRESSURE REGULATOR (1) fits onto the STEAM VENT PIPE
(2). When the proper operating pressure (12 lbs/sq. in.) is reached, the pressure regulator will rock gently and control the pressure inside the cooker. The gentle rocking motion of the pressure regulator is an indication that the proper cooking pressure is being maintained.

b. The SAFETY LOCK (3) automatically releases air from the unit as you
begin heating the pressure cooker. As pressure builds, the safety lock
slides up, causing the LOCK PIN (4) to lock the lid in place. The safety
lock will be in the up position when the cooker is pressurized. When the
safety lock is in the down position, the unit is depressurized and safe to
open.

c. The SEALING RING (6) fits around the inside rim of the lid (see below)
and forms a pressure-tight seal between the LID (7) and the BODY (8) of
the cooker. If the vent pipe becomes clogged and excess pressure cannot
be released normally, steam is automatically released by the
OVERPRESSURE PLUG (9). This is a safety device and you should
check its condition periodically.

18 13. By reason of the forgoing acts or omissions, the above-named Plaintiff and/or
19 her family purchased the pressure cooker with the reasonable expectation that it was
20 properly designed and manufactured, free from defects of any kind, and that it was
21 safe for its intended, foreseeable use of cooking.

14. On or about July 20, 2019, Plaintiff was using the pressure cooker designed,
manufactured, marketed, imported, distributed and sold by Defendant TTU for its
intended and reasonably foreseeable purpose of cooking dinner.

15. While the pressure cooker was in use for cooking, the pressure cooker's lid
unexpectedly and suddenly blew off the pot in an explosive manner. The contents of
the pressure cooker were forcefully ejected out of the pot and onto Plaintiff, causing
severe, disfiguring burns to, *inter alia*, her face, chest and all four extremities.

Plaintiff and her family used the pressure cooker for its intended purpose of
 preparing meals and did so in a manner that was reasonable and foreseeable by the
 Defendant TTU.

4 17. However, the aforementioned pressure cooker was defectively and negligently
5 designed and manufactured by Defendant TTU in that it failed to properly function as
6 to prevent the lid from being removed with normal force while the unit remained
7 pressurized, despite the appearance that all the pressure had been released, during
8 the ordinary, foreseeable and proper use of cooking food with the product; placing the
9 Plaintiff, her family, and similar consumers in danger while using the pressure
10 cookers.

11 18. Defendant TTU's pressure cookers possess defects that make them
12 unreasonably dangerous for their intended use by consumers because the lid can be
13 rotated and opened while the unit remains pressurized.

14 19. Further, Defendant TTU's representations about "safety" are not just
15 misleading, they are flatly wrong, and put innocent consumers like Plaintiff directly
16 in harm's way.

17 20. Economic, safer alternative designs were available that could have prevented18 the Pressure Cooker's lid from being rotated and opened while pressurized.

19 21. As a direct and proximate result of Defendant TTU's intentional concealment of
20 such defects, its failure to warn consumers of such defects, its negligent
21 misrepresentations, its failure to remove a product with such defects from the stream
22 of commerce, and its negligent design of such products, Plaintiff used an unreasonably
23 dangerous pressure cooker, which resulted in significant and painful bodily injuries.

24 22. Consequently, the Plaintiff in this case seeks compensatory damages resulting
25 from the use of Defendant TTU's pressure cooker as described above, which has caused
26 the Plaintiff to suffer from serious bodily injuries, medical expenses, lost wages,
27 physical pain, mental anguish, diminished enjoyment of life, and other damages.
